Saul Fernandez Martinez

Senior System Administration in DevOps transition
Barcelona, Catalonia, Spain

Summary

Senior Systems Administrator with strong management and leading skills, growing for my transition to DevOps specialist. Last years have helped me to specialize in project and budget management, designing strategies and setting goals with a proactive and problem-solving attitude.

Working in a remote work environment and using new technologies and methodologies for remote team working, communication, and collaboration.

I consider myself as a decisive, proactive and adaptable person with good social and management skills. It is easy to see me smiling and joking with my colleagues to improve the mood and helping in whatever might be needed. Ability to work under pressure, problem-solving and quick learner.

Experience

Barcelona Graduate School of Economics
Senior System Administrator
June 2016 - Present
Barcelona Area, Spain

Main Duties:

- Participating in setting goals and monitor IT budget (Jira, OKR)
- Developing a technical strategy to ensure alignment with its business goals
- Research and consultancy of new technological solutions
- Project Management for developing, implementing, and migrating projects (Jira, Trello, Agile)
- Create and leave written/visual documentation for new technologies and procedures (Confluence)
- Admin server apps, perimeter firewalls, planning disaster recovery strategies and backup plans, etc

Methodologies and Technologies
